
STATE OF AI AND CONSIDERATIONS

Attachment: Biography: Eyal Darmon, Managing Director, North America
Public Service Data and AI Lead, Accenture

PowerPoint: The State of AI

BACKGROUND

Under the *2022–25 CalSTRS Strategic Plan*, Goal 2: Objective B, we’re focused on growing our capabilities and culture to support a strategic and innovation mindset. An increasingly important aspect of that is exploring the possibilities of Generative AI. Under the *2024–25 CalSTRS Business Plan*, we will explore responsible artificial intelligence to enhance CalSTRS’ operations.

PURPOSE

In this session, the Teachers’ Retirement Board will hear from Eyal Darmon, an Accenture Managing Director of Public Sector Data and Generative Artificial Intelligence Lead.

Darmon will discuss critical components of Gen AI such as: what Gen AI is, what is important for leaders to know when making decisions, and how to engage responsibly with this technology. Later, the board and executives will take these insights, along with the perspectives from the panelists in the next session, to have insightful discussions about shaping our vision and setting priorities in this area.
